

**ALTOFINA™**  
2018 LAMINATE COLLECTION

Welcome to a true world  
of **colour**. ALTOFINA offers  
great design, a perfect  
finish and quality service,  
all at a price that comes  
within budget.

Take a look at the Altolina HPL collection 2018.

Dazzling and innovative decors, finishes and performance grades have been introduced to mingle with a selection of mainstream decorative laminates. This balanced collection is available for you to create interior spaces that are both brilliantly designed and commercially affordable.

# Our Range

We've split our collection into simple categories, dependent on their visual design.

Our décor names are straight forward and the finish available noted under each swatch on the relevant range page.

## Plain Colours

Add a splash to your room

A range of 42 plain colours, 12 super modern decors in our Tuff Gloss range and 10 in our new Black & White range which feature the very latest in laminate surface technology.

All decors are available as 3050 x 1220 with many also as 3660 x 1525 and 2440 x 1220

## Wood Effects

Go against the grain

22 different wood effects with a variety of different finishes including several in a beautiful high-gloss. We also now offer a range of 10 decors specifically for walls and doors.

All decors are available as 3050 x 1220 with many also as 3660 x 1525 and 2440 x 1220

## Abstracts

A new reality

12 diverse and modern effects which have been inspired by materials from the real world.

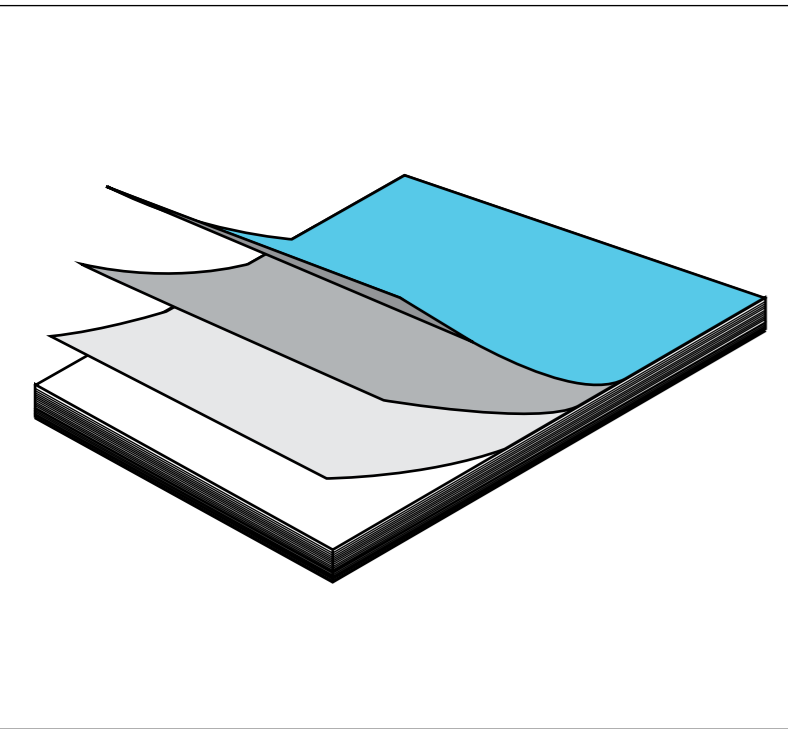

All decors are available as 3050 x 1220

## Metallics

Bend the rules

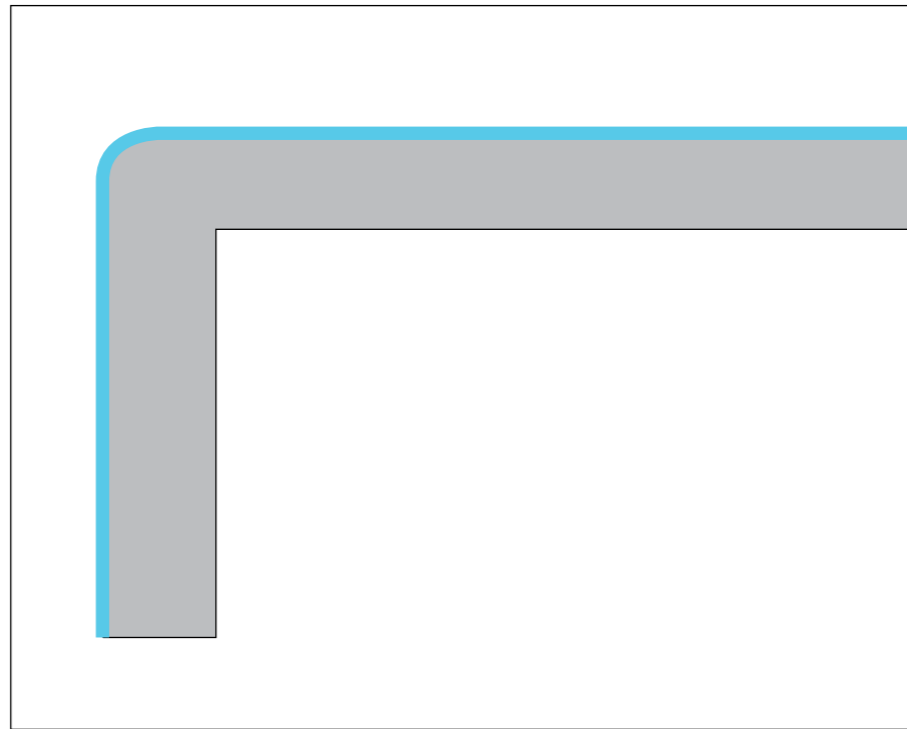

8 different metallic effects, created from real metal foil, perfect for the the most demanding of spaces.

All decors are available as 3050 x 1220

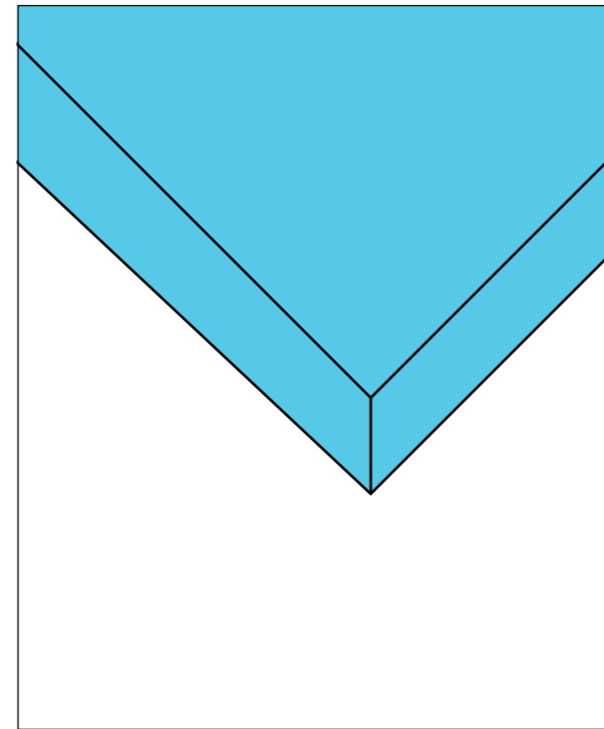

## Quality

Altofina high pressure laminates fully comply with the requirements of BS EN 438, NEMA LD3, ISO 4586 parts 1 and 2, including abrasion, impact, moisture resistance, postformability, tensile strength, safety of installation and ease of maintenance. All Gloss, Tuff Gloss, Metallic and Black & White ranges have a protective foil to reduce the risk of scratching during fabrication and installation. In addition, a protective foil is applied on all textured Plain Colours with an LRV value of 30 or less. The foil can be easily removed either before or after the installation is complete.

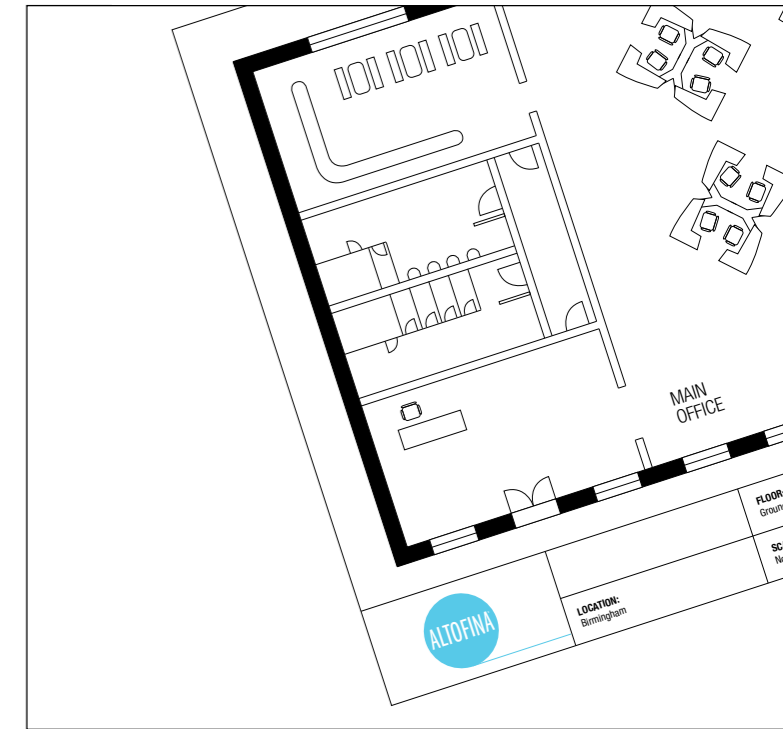

## Fabrication

Altofina can be bonded to various grades and thicknesses of chipboard, MDF, metal, mineral, lightweight honeycomb and other substrates to create a rigid panel. All décor ranges, with the exception of the Metals range, are available in postforming grade allowing both flat and curved applications for projects that need seamless shapes.

## ABS Edging

Acrylonitrile Butadiene Styrene (ABS) is a thermally resistant thermoplastic and is highly impact resistant. ABS edging can be bonded to the edges of Altofina panels to provide additional impact resistance and it colour matches all of Altofina's design ranges. ABS edging is suitable for flat panel edging as well as internal and external radii. It has excellent end of life disposal characteristics.

## Applications

Altofina can be used on all interior fit out projects, both for public and residential applications.

- Hotels

## Plain Colours

Add a splash to your room

From vivid spectrum to calm neutral, our colours will give you vast expanses of perfectly level, solid and consistent colour with a variety of textures.

Within our plain colours range we have two additional subsections: our Tuff Gloss and Black & White ranges.

### Tuff Gloss

A gloss finish will of course make the depth of colour more vivid. This is a great visual result, but standard gloss HPL shows scratching more easily than textured HPL. That is why Tuff Gloss has a special hardwearing coating to provide additional protection to the surface of the laminate. Each Tuff Gloss colour also has a removable protective foil. The laminate has all the technical performance qualities of standard HPL.

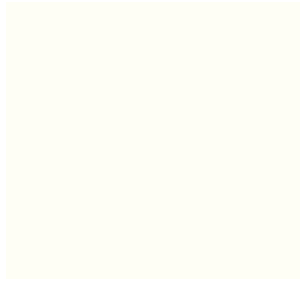

### Black & White

Our monochromatic Black & White range share 5 textures which reflect light from the laminate surface in distinctive ways. Each texture gives the designer the opportunity to make a refreshingly stark visual statement.

## Wood Effects

Go against the grain

Five distinct textures bring the feel of open woodgrains and a variety of sanded and polished finishes. Each texture has been carefully selected to sympathetically correspond with the natural grain of each species, bringing a realistic depth and character.

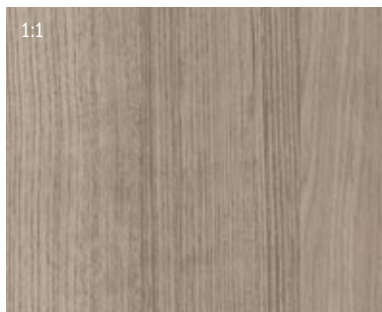

### Wall & Door Range

All available in a sheet size designed for doors and wall panels. A selection of striking long and short grain woodgrains, combined with a subtle texture that gives a realistic feel to the touch.

## Abstracts

### A new reality

Coloured glass, concrete, steel, oxidized stone and even woven cloth have all been given a new lease of life with some superb simulations of the real thing. The beauty of this process of replication is that (unlike the originals) the look of these diverse materials can be used as a decorative surface that is water proof, hygienic, low cost and easy to install and maintain.

### Protective Foil

Protective foil is applied to all metallic and gloss laminates and the darker plain colours. When post forming it is advisable to remove this coating from the area being heat treated.

### LRV value

All plain colours have a Light Reflectance Value (LRV) this is the amount of visible light that a colour will reflect.

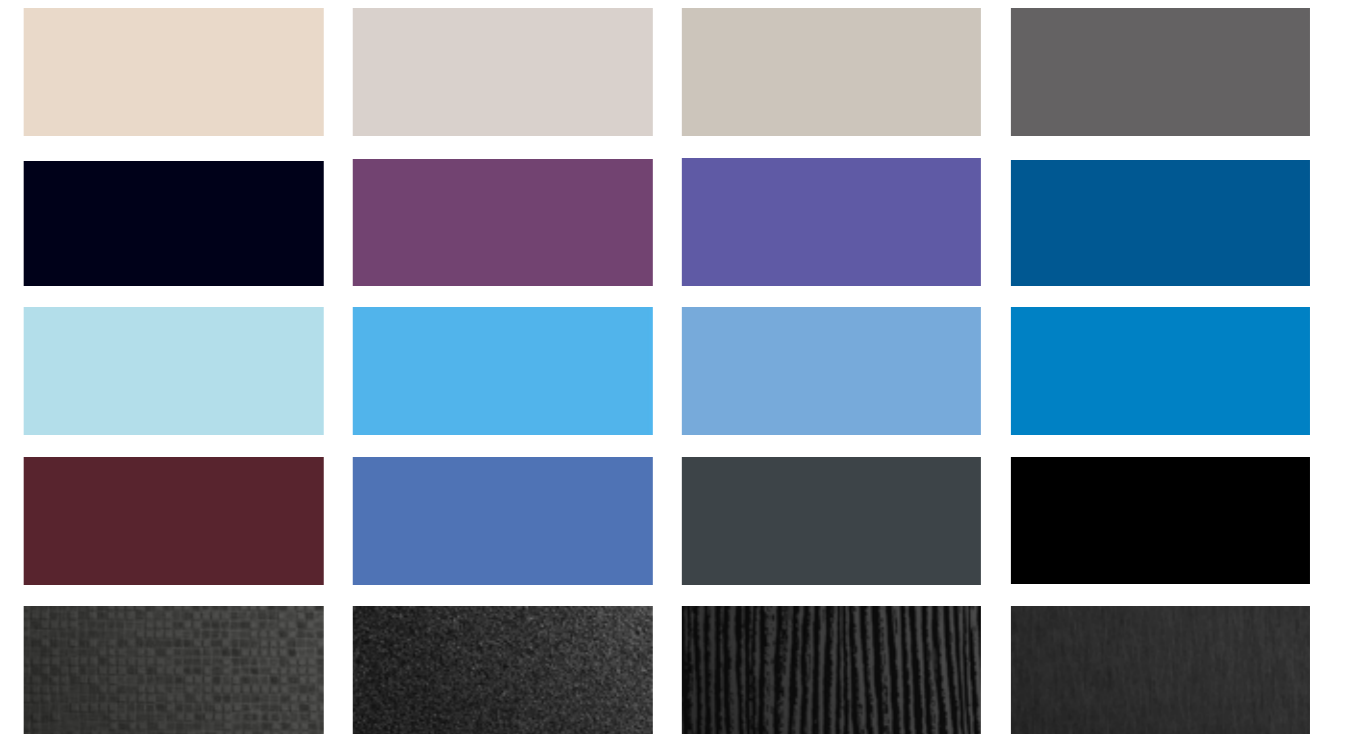

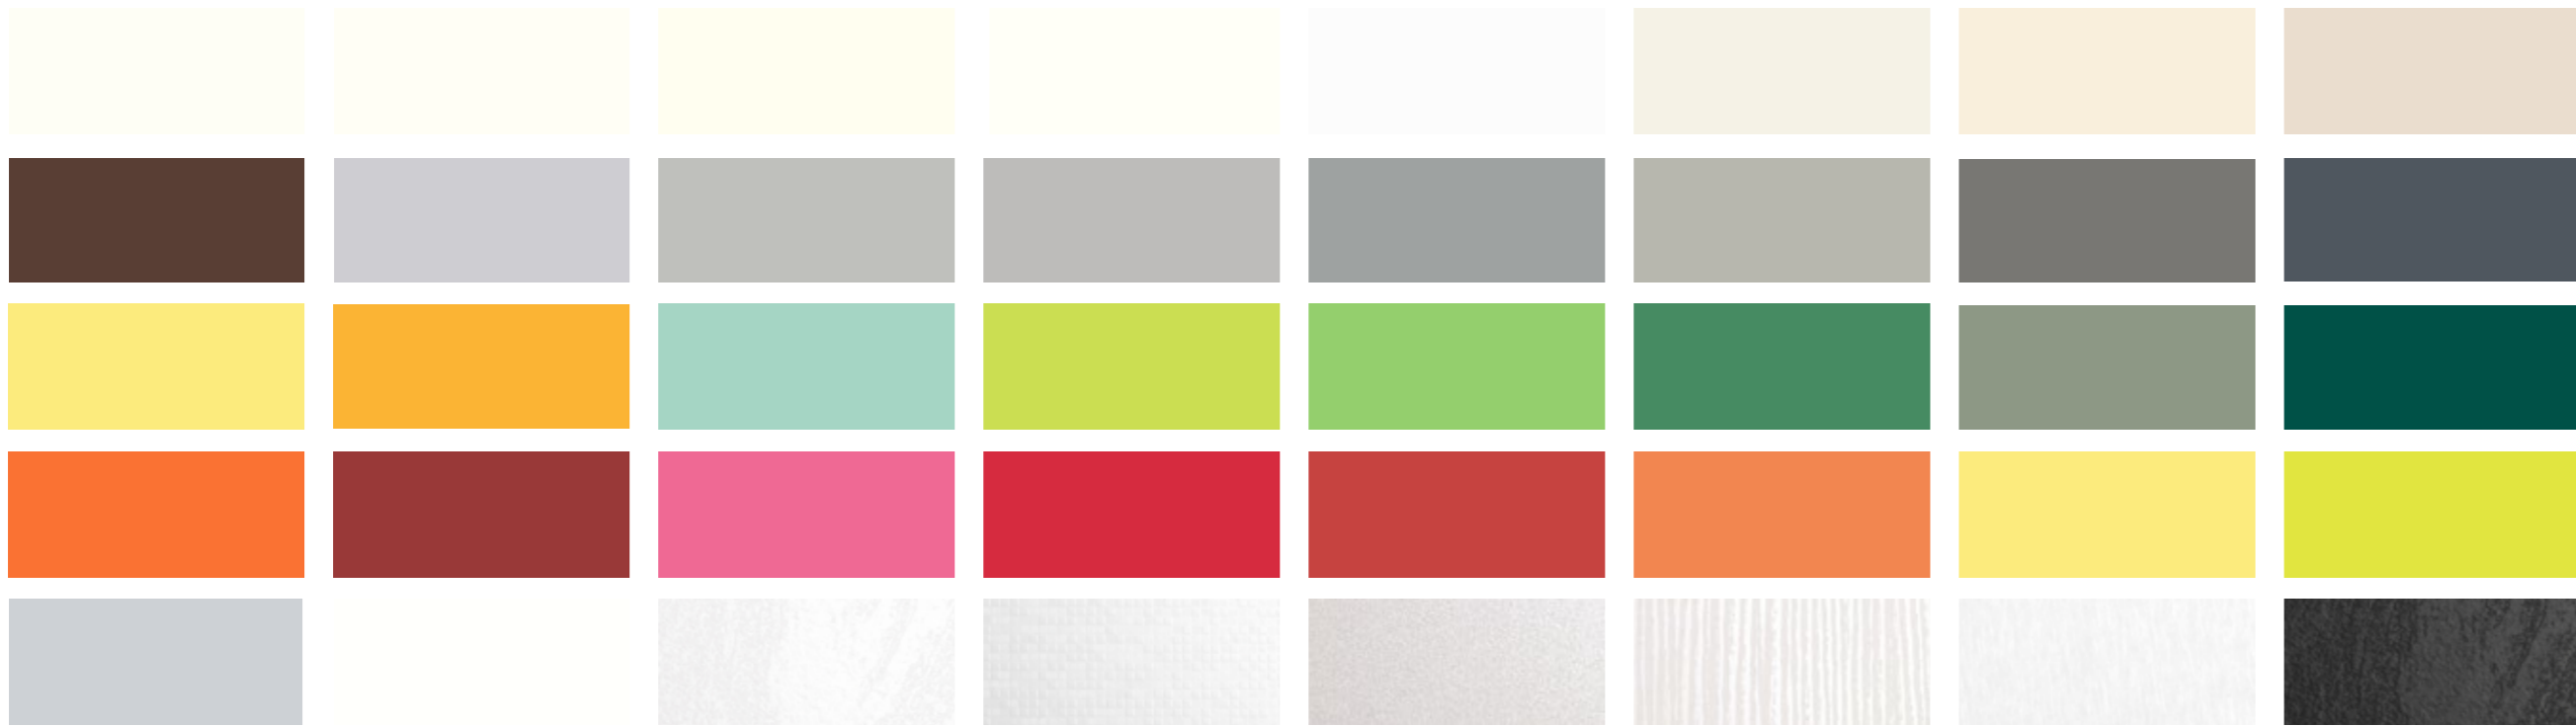

### Döllken ABS Edging

An ABS colour matched edging material. ABS is a more environmentally friendly version of PVC. ABS Döllken can be bonded to the edges of panels to colour match the decorative laminate panel surface. The panel edges also gain from the impact resistance that 2mm thick Döllken offers. Available in 75metre x 23mm x 2mm.

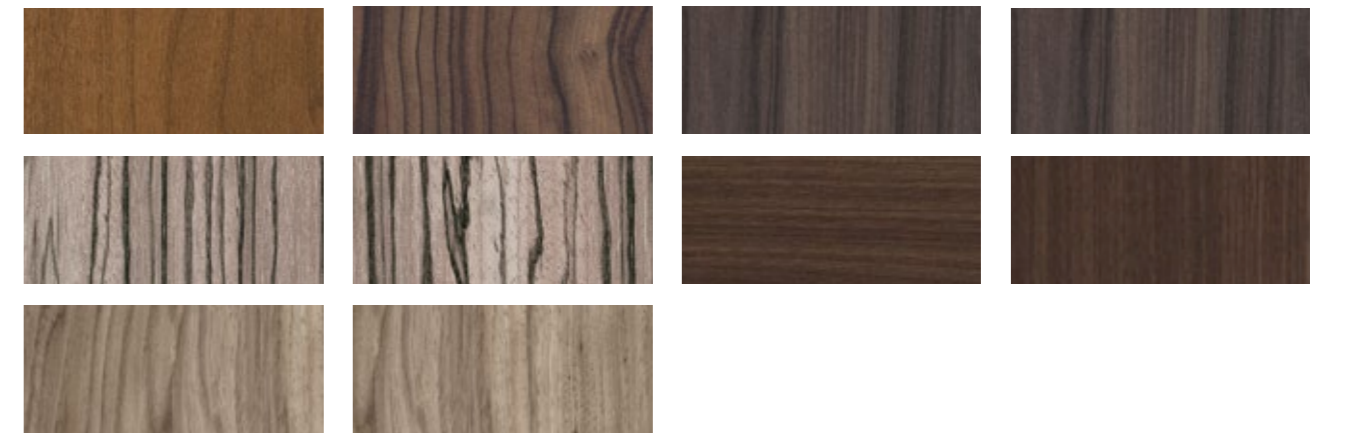

### NCS, RAL and BS Colours

All plain colours have a corresponding NSC, RAL and BS number, these are the closest matches.

## Sample Service

Please call us to order:

- **USB drive:** a data drive containing high-res images of all decors in the range. These images can also be downloaded from [altofina.co.uk](http://altofina.co.uk)
- **Swatch Chart:** this shows actual laminate samples including the surface finish.

## Environmental Policy

Altofina is manufactured using environmentally sound production techniques. Paper represents 65% of the product. The renewable paper is formed from softwoods which are either obtained from recycled sources or from sustainably managed forests. 35% of the product consists of synthetic resins which are not damaging to ecological systems and produce an end product which is completely safe, hygienic and approved for contact with food.

65% of Altofina decors have achieved FSC accreditation. These decors are identified on the availability chart. We are working towards having all Altofina decors accredited with FSC as soon as possible.

The Altofina woodgrain range achieves the look and feel of real timber, thereby avoiding the need to cut down rare and exotic species.

The UK and Ireland distributor of Altofina is Blackheath Products Ltd, which is an accredited FSC and PEFC chain of custody supplier.
